Breast Cancer Signs, Symptoms, Causes, Types, Treatment
Bladder cancer characteristically causes blood in the urine (hematuria), which may be visible (gross/macroscopic hematuria) or detectable only by microscope (microscopic hematuria). Blood in the urine is the most common symptom in bladder cancer, and is painless. Visible blood in the urine may be of only short duration, and a urine test may be required to confirm non visible blood.

Bladder cancer - Wikipedia
Glioblastoma, also known as glioblastoma multiforme (GBM), is the most aggressive cancer that begins within the brain. Initially, signs and symptoms of glioblastoma are non-specific. They may include headaches, personality changes, nausea, and symptoms similar to those of a stroke. Worsening of symptoms often is rapid. This may progress to unconsciousness.

Glioblastoma - Wikipedia
Colon cancer is the most common type of gastrointestinal cancer. It is a multifactorial disease process, with etiology encompassing genetic factors, environmental exposures (including diet), and inflammatory conditions of the digestive tract. Surgery currently is the definitive treatment modality ...

Colon Cancer - Diseases & Conditions - Medscape Reference
*The published literature overestimates the cancer risks. These studies are based on retrospective analyses, are biased towards families with an excess of cancer diagnoses and do not exclude probands from analyses.

749-Risk management for adults with a TP53 mutation | eviQ
Cancer is not usually inherited, but some types â€” mainly breast, ovarian, colorectal and prostate cancer â€” can be strongly influenced by genes and can run in families. We all carry certain genes that are normally protective against cancer â€” they correct any DNA damage that normally occurs ...
