Number: 0140. Policy. Aetna considers genetic testing medically necessary to establish a molecular
diagnosis of an inheritable disease when all of the following are met:

**Genetic Testing - Medical Clinical Policy Bulletins | Aetna**

Restrictive cardiomyopathies are the least common form of heart muscle disease. They are
categorized as infiltrative and noninfiltrative, storage diseases, and endomyocardial disorders. Genetic
diseases commonly present during childhood or adolescence. However, a growing percentage of elderly
patients with heart failure with preserved ejection fraction are being recognized as ...

However, the clinical laboratory is much different from Meloyâ€™s fictional world. Depending on patient mix
and the labâ€™s financial and technical resources and personnel expertise, selecting one NGS platform
rather than another can be the wisest move.

**Targeted NGS or exome? Consider the clinical context**

Professor Semsarian studies the molecular, genetic, clinical and translational aspects of cardiovascular
disorders that have a genetic basis, with a particular interest in investigation and prevention of
cardiomyopathies and sudden cardiac death in the young.

**Professor Christopher Semsarian - The University of Sydney**

Diagnosis of DCM Once there is clinical suspicion based on the patient history and physical exam, the
diagnosis of DCM is primarily based on echocardiography.

Clinical cardiac electrophysiology is a branch of the medical specialty of cardiology and is concerned with the study and treatment of rhythm disorders of the heart. Cardiologists with expertise in this area are usually referred to as electrophysiologists. Electrophysiologists are trained in the mechanism, function, and performance of the electrical activities of the heart.

The Dobermann (/ˈdɔːbəmən/, German pronunciation: [ˈdoːbɐman]), or Doberman Pinscher in the United States and Canada, is a medium-large breed of domestic dog that was originally developed around 1890 by Karl Friedrich Louis Dobermann, a tax collector from Germany. The Dobermann has a long muzzle. It stands on its pads and is not usually heavy-footed.

Dobermann - Wikipedia
The clinical laboratory is an inherently dangerous place. Laboratorians face a variety of dangers working in an environment that contains biohazards.
