x Quality of life is increasingly recognized as an important outcome of cancer treatment. Previous studies have examined clinical predictors of quality of life, but with the increasing prevalence of wearable sensors that monitor sleep and activity patterns, further investigation into whether these behaviors are predictive of post-treatment quality of life is now feasible.

The gavel in Chief Circuit Jay Hoke's courtroom, where the 22 people indicted by a Lincoln County grand jury will be called for plea hearings over the coming weeks.

Lincoln Journal Online
Pain is a distressing feeling often caused by intense or damaging stimuli. The International Association for the Study of Pain's widely used definition defines pain as "an unpleasant sensory and emotional experience associated with actual or potential tissue damage, or described in terms of such damage"; however, due to it being a complex, subjective phenomenon, defining pain has been a challenge.
