rural hygiene a hand pdf
Hand washing (or handwashing), also known as hand hygiene, is the act of cleaning hands for the purpose of removing soil, dirt, and microorganisms. If water and soap is not available, hands can be cleaned with ash instead. Medical hand hygiene refers to hygiene practices related to medical procedures. Hand washing before administering medicine or medical care can prevent or minimize the spread ...

Hand washing - Wikipedia
Hand hygiene is defined as handwashing or washing hands and nails with soap and water or using a waterless hand sanitizer. Hand hygiene is central to preventing spread of infectious diseases in home and everyday life settings. In situations where handwashing with soap is not an option (e.g., when in a public place with no access to wash facilities), a waterless hand sanitizer such as an alcohol ...

Hygiene - Wikipedia
Diarrhoea is the single biggest cause of infant and child mortality in India. Worldwide, surveys have shown that hand-washing alone reduces the instance of diarrhoea by as much as 43 percent.
